## Dr. S. R. McGregor Now Practicing in Oyen

Dr. S. R. McGregor, recently of Red Deer, Alta., arrived in Oyen last Saturday, and is now practicing his profession here. His move to Oyen was the result of a visit paid earlier in the month, when he spent a few days in town, looking over the situation.

Dr. McGregor has purchased the hospital equipment and is renting the hospital and office building from Dr. Swartzlander who is shortly leaving for Calgary with his family, and will formally take over these institutions the first of the month. Meanwhile, Dr. McGregor is a guest at the Alberta, Hotel.

## Joseph Cooper, Former Pupil of Oyen School, Again Wins Distinction in Calgary High School

Joseph Cooper, son of Mr. and Mrs. H. J. Cooper of Oyen, has been recently announced as one of the winners of the McKillop scholarships, awarded to the highest standing pupils in all Calgary high schools. During his studies in Calgary the work of this pupil has been of outstanding excellence, and he just failed to win the Bennett scholarship, awarded to the boy and girl passing highest in the city in Grade XI and Grade XII by the narrow margin of .03 points.

Mr. Jack Aylesworth left yesterday for Edmonton, where he will attend University, to continue his studies in medicine.

## RAILWAYS OF ALBERTA SOLD TO THE C. P. R.

Edmonton.—The Government announced recently, the completion of negotiations by which, subject to confirmation and ratification by the Dominion and Provincial legislatures and the shareholders of the Canadian Pacific Railway, the Provincial Government railways will be sold to the Canadian Pacific Railway with the exception of power to the Canadian National Railways to participate in half the obligations and half the benefits.

The purchase price is:

First.—The payment of \$20,000,000 as follows:

(A) Assuming first mortgage bonds of the Edmonton, Dunvegan and British Columbia Railway to the extent of \$4,200,000.

(B) Payment of the sum of \$15,800,000 as follows: \$5,000 on the first of June, 1922; \$5,000,000 on the first of June, 1923; \$5,800,000 on the first of June, 1924.

Balance, \$5,800,000 in ten years thereafter with interest at 4 per cent. from the date of the sale.

Second: The purchaser assumes all obligations made and the Government entered into in the extensions now being made to the Edmonton, Dunvegan and British Columbia and Central Canada Railways. As these extensions will probably involve another \$10,000,000 or more by the time the extensions are completed, it is seen that the total purchase price is in the neighborhood of \$20,000,000.

The company further agrees to complete sixty miles of extensions in the next five years. It was not possible to get any commitment with respect to the coast outlet, but it will be submitted at the joint offer remembered at the last session of the presidents of the two railway companies who have no commitment whatever in this respect.

In the first offer made by Mr. Beatty on his return from the Peace River the \$15,800,000 was to be paid in ten years with interest at 4 per cent. In the subsequent negotiations it has been taken place this was improved to principal as above indicated.

## Mail Pension Cheques

Manitoba Old Age Pension Scheme Now In Operation

Winnipeg.—Hon. W. J. Major, M.C., announced that approximately 1,700 old age pension cheques will be mailed to aged persons in the province of Manitoba at the end of this month by the old age pensions branch of the Workmen's Compensation Board.

The pensions are at the rate of \$20 a month.

Legislation passed at the last session of the provincial government provided for the old age pensions scheme.

The scheme was approved in an agreement between the provincial government. There are still nearly 2,000 claims for old age pensions to be investigated in Manitoba.

## Legacy For Lady Byng

London, Eng.—Lady Byng, wife of the hero of Vimy Ridge, is left £750,000 in the will of Pandolf Hall, a wealthy Greek merchant, who was a relative of hers, says the Evening Standard. Hall was a romantic figure in English society. He was a friend of King Edward VII. and of Lord Kitchener. He died at Brighton last August at the age of 82.

## Letter Carriers' Demands

Windsor.—A boost in maximum salaries from \$1,500 a year to \$2,100, a seven-day week and a five-day week comprise the demands made by the Canadian letter carriers of the government as formulated by the delegates to the biennial convention of the Federal Association of Letter Carriers of Canada.

## Wants U.S. Gamblers

Toronto.—The Ontario Government, acting through the department of the attorney-general, will take immediate steps in an effort to secure the United States gamblers who do not commit acts of violence upon Canadian soil. Attorney-General Price has issued this warning to United States gamblers.

## Reject Marketing Board Plan

Sydney, Australia.—The growers have rejected a scheme to form a marketing board to control the sale of wheat for the next three years. A ballot to decide the course should be taken on the matter resulted in 7,453 growers opposing the scheme, while 6,026 approved it.

## Nations Must Agree On Naval Matters

Or Conference On Disarmament Would Be Useless Says Dr. London.

Geneva.—An early meeting of the League of Nations preparatory committee on disarmament would be useless unless an accord on naval matters is reached among the five big powers, says Dr. Louden, president of the committee. Dr. Louden, who is Dutch ambassador to France, suggested that the best way to meet this condition would be through a private conference at Paris of representatives of the United States, Great Britain, France, Italy and Japan. He said such a conference might readily reach an agreement on the points respecting naval matters which now divide them.

He said that unless a working basis could be found among these powers, the great powers would not take the responsibility of re-convening the preparatory commission except upon a direct mandate from the full assembly of the League.

## River Steamer Wrecked

Sinks After Hitting Huge Boulder In Peace River

Peace River.—The steamer D. A. Thomas, according to reports received here, was struck and broken in the middle by a huge boulder.

Since the palatial steamer left here September 10, loaded with freight for Vermilion Chutes and other way points, navigation has been hampered under the most trying circumstances, due to the extremely low stage of water. She was on her way upstream loaded with 60 head of cattle and several passengers when disaster overtook her. The cattle swam ashore and all aboard were rescued. The steamer Thomas was built by the late Baron Rhonda in the summer of 1915, and was one of the finest on the inland waters. The material for her construction was freighted in over the old Grand trail by teams when the end of the season was over and her cost was upwards of \$100,000.

## Northcott Is Apprehended

Youth Wanted On Murder Charge, Arrested In B.C.

Vancouver, B.C.—Gordon Stewart Northcott, wanted by the British Columbia authorities on a murder charge in connection with the alleged slaying of a woman on a cattle ranch, and for whom the entire Canadian West has been searched for several days, was arrested at Okanagan Landing, five miles south of Vernon, by provincial police Constable Morley Green, according to information telegraphed to Inspector Forbes Criddle, sheriff, in charge of the Vancouver District.

The arrested youth, according to the police, did not deny his identity nor did he actually admit it. The police are certain, however, that he is the much-sought man for whom a country-wide search has been in progress for several days.

## Trail Riding Popular

Banff, Alta.—Trail riding in the Canadian Rockies is increasing in popularity. In 1922 Pat Brewster had five parties on the trail. In 1923 there were 19 who took this form of pleasure as the only way in which to see the full beauty of the Rockies. Last year the number was augmented to 41, and this year it will run to about 50.

## Death Of Mrs. Hayter Reed

Montreal.—A cable message received here announced the death in London, Eng., of Mrs. Hayter Reed, eldest daughter of the late Chief Justice Armour of Toronto. The late Mrs. Reed was prominent socially in Montreal and throughout Canada.

## High Commissioner To Dublin

Dublin, Irish Free State.—It is stated on good authority that negotiations are proceeding between the British government and the Irish Free State regarding the appointment of a high commissioner to Dublin.

## Loss From Damage Claims

Canadian and U.S. Railways Face Heavy Claims For Damages

Winnipeg.—Representatives of Canadian and United States Railways are meeting in Winnipeg to seek some method of reducing the enormous amount of damage claims paid for lost and damaged goods. Last year this amount totaled \$38,000,000.

A great deal has been done already as was reported at the meeting. In 1920 when the railways were first aroused and took definite action the figure was \$119,000,000. Since then reductions have been brought about each year. Shippers and receivers are co-operating better with the carriers and a great deal of education has been done among railway employees with a view to lessening rough handling and the other cause of loss. The American Railway Association expects three full time special representatives to gather data on the subject and present it to the parties concerned.

## Famine In Russia

\$50,000 Persons Will Be Fed Through Public Funds

Khar'kov, Ukraine.—Eight hundred and fifty thousand persons will be fed through public funds during the coming winter in the Ukraine, the great steppe having fallen far below the need of the population. Ordinarily the Ukraine is one of Russia's granaries and in good years wheat is both to eat and to export.

The Moscow government has appropriated 21,000,000 rubles, the Ukrainian government 10,000,000 rubles and social service organizations have begun a campaign to raise an additional 6,000,000 rubles to provide food for the winter for the starving population. One-third of the Moscow advance is a gift and the balance is a loan.

## SAYS CANADA PROVED TO BE A REVELATION

Southampton, Eng.—"Canada is the most interesting country I have ever seen," said Mr. H. H. Ho, J. Ramsay MacDonald, leader of the Labour Party in the House of Commons, on his arrival here after a visit to the Dominion.

In an interview he said he did not think immigration to Canada would "cure" or even substantially alleviate unemployment problem.

"There is no doubt a very determined attempt is being made by certain people to spread discontent among the harvesters. It is my impression that a considerable number of the men will remain and get employment in Canada."

"From east to west in Canada the British worker is preferred to anybody else, providing he is prepared to do the work Canada requires him to do."

He expressed the opinion that the problem of winter work could easily be solved if one simple system of organization were brought into existence. Statements that Canada does not welcome British workers were untrue, he said.

"After more than twenty years absence from Canada," Mr. MacDonald remarked, "I hardly recognized place and people. I had visited before, but this was an absolute revelation and a good revelation to me."

"There is a reality of expansion, a youthfulness and a hopefulness in Canada," said the former British premier. "The weakness is that Canada has not got sufficient magnetic power to keep her people both Canadian born and British immigrants within her domains."

## BRITISH HARVESTERS IN ACTION

Photograph shows a group of British harvesters aiding in the gathering of Canada's 1928 bumper crop.

## NOTED ENGLISH STATESMAN

The late Lord Haldane, Viscount of Clova, noted English statesman, died recently at the age of 72.

The late Lord Haldane, Viscount of Clova, noted English statesman, died recently at the age of 72.

## New Northern Route Is Complete Success

Was Opened By Blasting Of Montreal River Channel

The Pas, Man.—Saskatchewan's new route into the mineralized country of the far north, made available by the federal government, blasting rocks out of the Montreal River in Central Saskatchewan, is a great success.

Hon. Thomas C. Davis, attorney-general of Saskatchewan, and Frederick MacDermid, K.C., of Saskatoon, accompanied by their wives, left Prince Albert on September 5, to make the swing around the great water hole in the northern part of the province.

The voyage ended Tuesday afternoon, September 18, at The Pas, and was a complete success in that only 14 days being required for the entire trip.

Those distinguished travellers were accompanied by their wives, proves conclusively the ease with which the new passage can be made.

## Rules In Oratorical Contests Altered

Manitoba Trying To Reduce Interference With School Studies

Winnipeg, Man.—Alteration of rules for international oratorical contests, designed to reduce to the minimum interference with school studies, has been decided upon by the provincial central committee. Under the new rules, Manitoba will take part in the contest.

The contest is open to students of grades 10, 11 and 12 only. Last year students of grade 9 were eligible.

Schools teaching any of the grades from 10 to 12 are to be asked to decide their respective champions by Christmas, by any method they determine, provided public speaking by a considerable number of the pupils is involved.

The preliminaries to the championship contest in Easter week are to be complete by the end of March. The district elimination contests are to be held before Christmas.

## Eligible For League Posts

Geneva.—Women's rights have won still another victory. Henceforth applicants for League posts need not be male. Women are now assured representation. A resolution to this effect was given unanimous approval by delegates at the League assembly in Geneva.

It was introduced by Dame Edith Lytton, of Great Britain.

## Will Enter Oratorical Contest

Winnipeg.—Manitoba will enter the international oratorical contest next year. It is announced. A number of teachers had objected to the contest, and for a time it was thought that Manitoba would drop out, but it has been decided to enter again and continue for another year. It will depend upon the measure of success of the contest now being arranged.

## New Branch Lines

Settlers In Saskatchewan Are Promised Railway Facilities After Long Wait

Winnipeg, Man.—Settlers of Saskatchewan have waited in some cases for as long as twenty-five years for railway services and are now, before the end of 1929, is the announcement from Western Headquarters of the C.P.R. made here.

In the south section of the province a line of eighteen miles will be completed easterly from Coonawach, 37 miles westerly from Wood Mountain to the Conal branch of the C.P.R.

Another branch line 12 miles easterly from Coonawach will give railway services to settlers of the Lake Johnston District.

Possibly the most important of the lines are those from Haldane, Atkins and Penman. The Haldane extension north-easterly of about eighteen miles will tap the Fox Valley country at the west side, and the line from Penman, 24 miles south-westerly, will tap it from the east side.

From Atkins, the first station east of Swift Current on the Main Line north-easterly of about 20 miles, a branch approximately 20 miles long will be sent northward. This line will eventually connect Swift Current direct with Saskatoon.

In Central Saskatchewan the following lines are being projected: From Foam Lake, southwesterly 27 miles.

From Rosetown to Perth, 42 miles.

From Urwin, westerly 20 miles.

Northern Saskatchewan will benefit by the 10 miles northwesterly from Lloydminster.

## New Branch Line Opened

First Train From Melfort North Makes Journey Over C.P.R.

Melfort, Sask.—The opening of the new branch from Melfort north on the C.P.R. created considerable excitement, designed to reduce to the minimum interference with school studies, has been decided upon by the provincial central committee. Under the new rules, Manitoba will take part in the contest.

Every station platform along the way was jammed with people who were anxious to greet the first train. The distance between Melfort and Edgemoor over the new branch is 100 miles. The train was met by a large crowd of people who were anxious to see the train. The train was met by a large crowd of people who were anxious to see the train.

## DEATH TOLL IN STORM AREA MOUNTS HIGH

Washington.—With death reports to say that the Red Cross from the tropical hurricane area—Guam, Porto Rico, the Virgin Islands and Florida—reaching 1,199, the relief plans were rushed to consider the possibility of disease and pestilence following in the wake of the storm.

Hundreds of injured are to be treated. Thousands of injured are to be treated. Thousands of injured are to be treated.

Figures reaching the Red Cross from the dead are as follows: Guam, 600; Porto Rico, 100; Florida, 427; Virgin Islands, 6.

Estimates of injured run into the thousands. Property damage is estimated at exceeding \$100,000,000. Tens of thousands are without homes.

The chief concern of the Red Cross and local relief agencies is now centered in maintaining sanitary conditions in the area ravaged by the hurricane.

Plans were rushed to establish two camps in Palm Beach to care for refugees where they can obtain rest and medical attention. Sanitary conditions in the interior of Palm Beach were reported bad.

Governor General Waldo Evans of the Virgin Islands, notified Red Cross headquarters that health conditions were bad but that there was no immediate danger of an epidemic.

United States Consul William H. Hunt, reported from Guadalupe in the French West Indies that disease in epidemic form is feared.

Evans and Hunt both appealed for Red Cross aid in the emergency.

Henry M. Baker, National relief director for the Red Cross, arrived in Porto Rico and rushed to headquarters here while there was no immediate danger of epidemic there, he said conditions were bad and food and clothing needed.

## AIR EXPRESS TO BE INAUGURATED IN WEST SLOAN

Winnipeg, Man.—The ability to save time by air express was proven recently when the Hon. J. H. McLean, of the Western Canada Express, gave a stop on the grounds of a regular air express service, carrying several express packages from Edmonton and Saskatoon for delivery in this city.

Between Calgary and Edmonton the plane experienced rough weather and was forced to return to the former city to await more favorable conditions. This in itself made the time of the journey later than expected but from Edmonton to Saskatoon the 500 miles was covered in three hours and forty-five minutes, which is a saving of several hours.

This air express has proved to be a very satisfactory and the officials of the Canadian Pacific Express will inaugurate early next month a regular air express service, connecting with arrivals and departures of trains at cities between here and Calgary.

The method of procedure for this service is that the express agent will gather all parcels marked with the air express stamp and will deliver by truck to the airfield where, after careful checkings, they are turned over to the pilot, who after signing receipt deposits them in a specially designed cubicle in the lower front part of the plane. Upon arrival in each city, the parcels are picked up at that point are turned over to the express agent for delivery.

## Looks For Better Prices

United States Farmers Are Urged To Hang On To Their Crops

Washington, D.C.—Secretary Justice Brandeis in a statement released through the Republican national committee that "if Governor Smith is elected, the price of wheat and the schedule of the United States, as Governor Smith forecast in his acceptance speech, the entire farm industry will be thrown into a state of utter demoralization."

He reiterated his views that wheat farmers should hang on to their crops. He said that the present price level is lower than justified, and that the price level should be raised.

Noting prospects of "increase in the price of wheat," he said that the forecast for the biggest Canadian wheat crop in years, however, may from a world point of view the situation is about the same as last year.

He said that the growth of world population, he asserted, would increase foreign demand.

## Plot To Kill Trotsky

Several Attempts Are Made To Assassinate Exile In Siberia

London, Eng.—The London Daily Star says that several attempts to assassinate Leon Trotsky, since his flight to Siberia by the Soviet government, have been made.

According to the reports, Trotsky had written letters to Christian Rakovsky, former Soviet envoy to Great Britain, describing how his cottage was besieged and how sharpshooters attacked him from trees.

Trotsky said that he and his son defended their house with two sporting guns and told how the attack was repulsed.

After the failure of the sharpshooters, local authorities denied food to the Trotsky family, the latter were forced to leave the area.

Only the kindness of friends saved them from starvation.

## Windmill Plane Crashes

Le Bourget, France.—The auto-gyro or flying windmill, in which the Spanish inventor, Juan de la Cerva, made a successful flight across the English Channel, crashed in the course of a trial flight here and was badly damaged. Senior de la Cerva and his mechanic were bruised but escaped serious injury.

## To Be Deported

Ottawa.—Edward Evans, British harvesters who came to Canada following his conviction on a serious charge in England, is to be deported. It was learned at the department of immigration. Evans was given the option by the magistrate of spending a term in jail or leaving England.

## Form New Association

Ottawa.—A new organization of postal employees, to be known as the "United Postal Employees of Canada," was launched here by the fifth annual convention of the Dominion Postal Clerks' Association.

## Mysteries Of Life

British Scientist On Verge Of Discovery Of Many Hidden Secrets  
Science is on the verge of discovery of the difference between life and death, Prof. Frederick M. Davis, tells numbers of the British Association for the Advancement of Science.

At the very latest stage of life and death, the English physicist, A. V. Hill is on the eve of a discovery of astounding importance if indeed he has not already made it," said the lecturer.

"It appears from his work that the organized structure of nerve cells requires oxygen and therefore exists to preserve it. This organization is a way of tending to run down and approach disorganization."

"The life machine is therefore totally unlike ordinary mechanical machines, the living cell is like a battery which is constantly running down and requires constant oxidation to keep it charged. I believe these analogies are of enormous importance. For the first time in the history of science we begin, perhaps as yet a little dimly, to understand the difference between life and death and therefore the very meaning of life itself."

Life is a dynamic molecular organization kept going and preserved by oxygen and oxidation. Death is a natural breakdown of the structure, always present and only warded off by the structure preserving "action of oxidation."

## Dust Travels Long Distance

Has Been Carried By Wind As Far As 2,500 Miles From Its Origin

Wind catches the atmosphere with millions of tons of dust every day, and it is often carried to great distances before it settles to the earth. In China, an area of some 200,000 square miles is covered to a depth of thousands of feet with a fine yellow soil called "loess," which is supposed to have been brought by winds from the deserts and dry slopes of Central Asia. In March, 1901, a series of dust storms occurred in the northern part of the Sahara Desert, in Africa, and the dust after being lifted upward by cyclonic winds of great height was eventually deposited over most of Western Europe in a distance of 2,500 miles from the place of origin. German scientists estimated that not less than 1,800,000 tons of the deposit fell in Europe and over the Mediterranean Sea. On the African coast the deposit is supposed to have amounted to 150,000 tons.

## Remarkable Bath In Iceland

Water, Conducted, Through Underground Passage From Hot Spouting Fountain

One of the great legends of Iceland was Snorre Thurling, who wrote a book about the kings of Norway, and he built a remarkable bath which is still preserved after more than six centuries. The bath which is circular in form and about 15 feet in diameter is built of heaped and piled fitted and held together by a fine and durable cement. Around the inside rim of the basin runs a stone bench, capable of seating twelve persons. The water for the bath is brought from a hot spouting fountain, and is conducted for a distance of 100 feet through an underground passage. An aperture which lets in the water can be closed at will, and another opening in the bottom of the bath allows of being closed with a stone capable of being closed with a stone allowing the water to flow out. In this way the bath is kept perfectly clean.

This year British machines, the fastest and best in the world, have flown 2,000,000 miles without serious accident to passengers or pilots.

The blue ash is the first of the ashes to blossom, but unlike all others it has perfect flowers.

This year's Royal Academy contains exhibits executed by 21 London teachers.

"Why are you beginning with two hats?"

"Trade is no trick that I have had to enlarge my premises."—Hus Humer, Madrid.

W. N. U. 1752

## Women Smokers

Jack Miner Comments On The Danger To Calumny Generation

Jack Miner, Canada's noted naturalist, has the following interesting comment to make on women smokers.

"The other morning, while on the train en route from a lecture tour in New York City and Boston, Massachusetts, for my breakfast to be served, a morning newspaper was handed me which, on the front page in capital letters, read these words: 'Henry Ford Hanged.' Naturally, I thought of smoking cigarettes. I have had to put in the longest time I had of Mr. Ford. I say this alone shows the caliber of Mr. Henry Ford and his interest in the moral side of life and in the born and unborn generations and his interest connected with the character of Mr. Henry Ford, was down in history."

If more men will take Mr. Ford's example and have a backbone instead of a wobble, the world will show this world a bit and children a century from now will have healthy reasons to thank him. So many men ask why I am so opposed to women smoking, and in reply will say: "The biggest asset the world has is its babies, and the hope of the world is permanent peace. I love love and education among its babies and who will profit by the mistakes of their forefathers, but what is a pitiful thing if these babies' growth, intellectually and morally, is going to be stunted through the mother's habit of smoking cigarettes, because before they are born, right here let me say to the world, I will give more for my child, than I can for any other education before he is born than I will any nine years after. I think every human being wants to see the world with a new generation of men and women, and who in the name of God can say to his women smoking it makes this world better."

## Fruit and Vegetable Wholesale

List Of Firms Dealing In Fruit and Vegetables

A publication of interest to fruit and vegetable growers and distributors, has been received and is ready for distribution. It is a list of "Wholesale Dealers in Fruits and Vegetables in Canada."

The list covers wholesale dealers in apples, other domestic fruits, potatoes, onions, and other domestic vegetables. It gives the names of the dealers, their addresses, and the cities in which they are located. It also gives the names of the dealers who are dealing in carloads at marketing centres or distributing points, and the names of the dealers who are dealing in small quantities at production points. Firms dealing a purely brokerage business are omitted as such.

The publication is Bulletin No. 101, "List of Wholesale Dealers in Fruits and Vegetables in Canada," and may be had upon application to the Publications Branch, Department of Agriculture, Ottawa. In distributing this list the Department assumes no responsibility for the financial standing of any of the firms listed.

## A Most Important Lesson

True Simplicity Possible Only When We Realize All Men Are Alike

One of the most important lessons that a man can learn is that all men are really alike; that all creeds and opinions are nothing but the mere result of a chance and temperament; and that no party is in the world better than another; that no creed does more than show imperfectly in the bottom of the truth; and that it is only when you begin to see this that you can feel that pity for mankind, that sympathy with its disappointments and follies and its natural human hopes, which have such a little line of growth, and a sure sense of duty.

## Commemorates Lost Village

Engine's lost village, Eccles, that now lies beneath the waves of North Walsham, Norfolk, was commemorated a few days ago by a service which was held on the lonely shore at North Walsham by a surprised clergyman and a little congregation of villagers and holiday-makers. The commemoration of the sea submerged the town and church many years ago.

## Meat Not Relished

Elephantinas were served at Lewiston, Idaho, after five circus pachyderms had stampeded through the streets and one of them had been killed. Meat cutters went to work and soon had the animal carved up. Those who ate the meat did not relish it.

Lady (at children's party): "Well, my little man, what are you going to be when you grow up?"

Little Man (tugging at uncomfortable necktie): "Bumsteif what don't wear a collar."

## The World's Great Banks

Five Largest Are All Located In London, England

Perhaps it is wholesome in this period of our rapid financial growth to be reminded that other English-speaking nations possess banking institutions as large as, or larger than those of which we boast. The newspapers.

counts of purchases and amalgamations, and the size of the major banks, so fully dwell upon the importance and magnitude of similar concerns in other parts of the English-speaking world but scantily realized. A recent compilation by the California Bank of Los Angeles of 100 of the largest American, British, colonial and dominion banks is striking evidence of the banking power of these countries.

Ninety American banks have assets more than \$100,000,000 on deposit, whereas only 60 banks in the British Commonwealth of Nations have more than \$18,500,000. The five largest banks are all located in London. Of the five most, one is the Royal Bank of Canada and another is the Federal Reserve Bank of New York. In other words, if this semi-government institution be left out, we have only three in the first ten.

Eleventh in rank is the Bank of Montreal, and twelfth is the Bank of Australia, and two other Australian banks are found in the first 40. A Liverpool bank ranks twenty-sixth and one in Manchester is thirty-third.

The colonies and dominions are not the rather weak lands which the most ignorant American sometime carelessly suppose. Though it is true that London and New York dominate the list, the fact that the ninth, tenth and eleventh banks are in Montreal and Toronto, the thirteenth in San Francisco and the sixteenth and twenty-first in Chicago shows that other centres are great reservoirs of funds.

## Peblans In Old Rome

Were Poor Commuters and Received Harsh Treatment From Patricians

Roman slaves were called Peblans and were originally forbidden all political rights. They were for the most part poor, and not allowed to inter-marry with the Patricians. They served in the army without pay, were sold into slavery for debt, and could even be cut up in pieces for distribution among their creditors. Finding their condition intolerable, the Peblans in 495 B.C. repaired to Mons Sacer, near Rome, where they resolved to build a new city; but this step alarmed the privileged classes, and they granted to the Peblans the right of choosing annually from their own number two magistrates, called tribunes, with power to protect them against aggression of the Patricians. After the lapse of about 200 years the disabilities of the Peblans were entirely removed.

The man who gives in when he is wrong," said the orator, "is a wise man, but the man who gives in when he is right is 'married,' said a weak voice in the audience."

Keep your temper if it is good, and be sure not to lose it if it is bad.

## HELPING TO HARVEST CANADA'S GRAIN CROP

Visitors to Zoo? Will this tiger eat off your head?

Keeper: Sure—eat off any part of you he kin git a hold of.

With swift decided strokes the artist painted in the colored clouds of evening sunset.

Presently he noticed an aged ragged samurai at the result of his labors.

"Ah," said the painter, "perhaps you, too, can read sky pictures, friend? Perhaps you have seen the lambent flames of dawn leaping across the horizon, the red-tinted vapours of mid-morning in a lake of fire?"

"No," replied the rustic shortly I haven't—nor since I signed the pledge."

Visitor (to Zoo): Will this tiger eat off your head?

Keeper: Sure—eat off any part of you he kin git a hold of.

"No," replied the rustic shortly I haven't—nor since I signed the pledge."

## Thunderstorm Causes Static

But Ease Of Good Radio Reception Has Its Uses

Thunder near at hand, the production of the static that occasionally interrupts radio reception, especially in summer. They also of the formation of a cable, rays—the rapidly moving electrons or atoms of electricity, that cause X-rays when they are stopped by a heavy metal.

This was the announcement made at Glasgow, Scotland, to the section of physics of the British Association for the Advancement of Science by Dr. A. Walton Watt, British Government radio engineer. But even though this static is the bane of good radio reception, it has its use, said the speaker. The weather observer can use this to locate distant thunderstorms, and he told the scientists how he had developed a special form of radio direction finder for the purpose. An experimental receiver of this kind has been ordered by the U.S. navy, he stated. Several years ago, when the U.S. navy was testing a receiver for getting weather maps from ships at sea, some similar experiments were made. The weather map received, the invention of C. Francis Jenkins of Washington, was directed to a direction finder, and the course of the tropical hurricane later struck Miami was recorded.

## Rapidly Becoming Obsolete

Country Store Is Becoming Modern In Every Way

The country store is passing. It is going to join the covered wagon, the town pump and the ox team. Thousands of them still keep their old store, but in other thousands glittering fixtures, plate glass windows, gilt cash registers and steam heat have supplanted the wood stove, the up-ended milk-begs, the cracked barrel and the dry goods box handy for the whittler's blade.

With its mingled smells of new rope, kerosene, yellow soap, coffee, cheese, piguet and calico, the country store is an institution as Canadian as green corn and apple pie. It is the will of the ruthless gods of commerce to destroy this institution, it will be the great loss and the great regret of the vast rural population of the nation.

Rural Canada is in process of transformation, and every step that process brings nearer to obsolescence the country store of song and story of the jester's fling and the cartoonist's satire. The hold-on stand, roadside garage and tea-house can never take the place of the country store.

## Was Not Seeing Things

With swift decided strokes the artist painted in the colored clouds of evening sunset.

Presently he noticed an aged ragged samurai at the result of his labors.

"Ah," said the painter, "perhaps you, too, can read sky pictures, friend? Perhaps you have seen the lambent flames of dawn leaping across the horizon, the red-tinted vapours of mid-morning in a lake of fire?"

"No," replied the rustic shortly I haven't—nor since I signed the pledge."

## Reindeer Survey Nears Completion

Investigators Of Department Of The Interior Are Now Of Great

Investigations by officers of the Department of the Interior to determine the reindeer grazing possibilities of the great northern plains of Canada reaching to the Arctic ocean are nearing completion. The study of the reindeer is being undertaken in 1906 for the North West Territories and Yukon Territory by Messrs. A. E. and R. T. Forsell, botanists and biologists, in order to decide the practicality of establishing herds of reindeer as a source of food and clothing for the Eskimos and Indians of the far north. A recent report from the investigators stated that they were working in the area north of Great Bear Lake. This part of the survey will be completed this autumn after which the party will return to Ottawa to present a complete report of their two years work to the Department.

The problem of securing new sources of food and clothing for the Eskimo native population of the north has engaged the attention of the Dominion Government for some time. For many years, driven back into the great interiorland by the effects of settlement and development from the south, has had to face new menaces from the tropical hurricane, the fire, the floods and hunting methods among the natives. Consequently this source of food supply is gradually diminishing and the need of providing a supplementary source of supply is becoming more pressing. The successful hunt for many years ago, when northern aborigines in other parts of the continent suggested the possibility of the reindeer being a solution of the problem in Canada. Reports from the Messrs. Forsell stated that an immense reindeer grazing area covering about 15,000 square miles lay between the Mackenzie River delta and inland from the Arctic ocean, which it was estimated was capable of providing grazing for 250,000 reindeer.

## A Scotch Indian

New Way Of Getting Message Sent For Nothing

This particular Scot stepped into a telephone office and picked up one of the blarney. He looked at the clerk behind the counter.

"How much," he asked, "is a telegram to Chicago?"

"A telegram to Chicago," responded the clerk promptly, "will cost you five cents a word for ten words. There will be no charge for the signature."

The Scot looked musingly at the clerk.

"There will be no charge for the signature?" he repeated after a pause.

"Yes, sir," said the clerk.

The Scot rubbed his forehead with the pencil.

"Well," he finally stated, "suppose you just send me a signature."

The clerk grinned.

"All right," he cried, "I'll do that for you. What's your name?"

"Another pause on the part of the Scot.

"Well," he finally murmured, "I haven't got a name, but I have a home."

"And my name is I-Won't-Be-Home-Friday!"

## Rooms For Two

J. Dawson Owens, for years a member of the famous Northwest Mounted Police of Canada, had a jutting humor all his own.

He followed a pompous individual to the hotel register one day, taking a little while that contained all the clothing he deemed necessary for a short stay. The man ahead was accompanied by a heavily laden servant.

"B. Alway Bruce and valet," signed the pompous one.

Ovens glanced at the signature, reached for his fountain pen, and without the trace of a smile, addressed the man to the register.

J. Dawson Owens and valet.

## Marble Shipped From North

The Manitoba Marble Company shipped three cars of marble from their quarry at Mile 39, Hudson Bay Railway, this week; since beginning quarrying the company has discovered that the marble does not exist in layers but has to be cut from the quarry in blocks. This fact adds value to the material for home and export, according to the quarry expert.

Mabel—"That's a lovely taut suit you're wearing. But aren't you afraid water will take the color out?"

Jean—"It might, so I always have it dry cleaned."

"Did you tell her when you proposed that you were a Jew?"

her?" "That always makes a great impression." "I was going to—but she told me first!"

"He is a stupid fellow. I must have talked nonsense to you."

"Yes. He talked about you all the time."—Topsy Elias, Paris.

## Bee Stores For Winter

Forty Pounds Needed For Each Five

To survive the winter and to resume brood rearing the following spring, bees require a considerable amount of food. While the amount needed for the winter months is not large, consumption increases very rapidly in the early spring, when brood rearing is resumed and before the weather is suitable to open the colonies. It is, therefore, a wise plan to give the colonies a good store of food in the autumn to carry them well on into the following spring. Each colony needs about forty pounds of food in the winter. In addition to what is in the hives, it is also advisable to carry over a few well-made combs of honey for emergency feeding in the spring.

The Dominion Apiarist, at the Experimental Farm, Ottawa, in discussing this question in "Seasonable Hints," says that healthy bees eject waste material only when flying and during the winter confinement to their hives it accumulates in the intestine. The amount of waste material is so great that if it is not ejected, it will be so important that the food given to the bees for the winter will be soiled and the matter as possible. Clover and buckwheat honeys are good but sugar syrup is the best for the dormant season. Honey is better than syrup for brood rearing is in progress. When feeding in the autumn, it is a good idea to have some honey on hand with the bees and then to feed them with sugar syrup made of two parts well granulated sugar to one part water. The syrup being stored last will be first consumed, thus putting off the consumption of honey towards spring. Those who wish to secure copies of "Seasonable Hints" may do so by forwarding their names and address to the Publications Branch, Department of Agriculture, Ottawa.

## British Women For Canada

Large Party Coming To Join Their Husbands and Families Here

One hundred and eleven British women destined to join their husbands and families, are coming to Canada in one large party on the Anchorage from the Kingdom. These women have secured passage through the auspices of the Society for the Overseas Settlement of British Women, which is supervised by the Church of England, and has been recognized as the women's branch of the Overseas Settlement Committee. Since 1909 this society has carried on the work of former women's migration societies in Great Britain. Through their efforts many hundreds of women and children from all parts of Great Britain are settled in Canada, coming in special parties under the care of trained conductresses.

This year the S.O.S.W.B., realizing the need in Canada for experienced domestic help, has made arrangements to test examinations in household work for women proceeding to Canada. The examinations are to be held in Great Britain. The society conducts investigations here as to the conditions for housework, and applies to the Dominion Government the right kind of women for settlement. They also assist women and children to meet their men-folk already settled in this country.

## A Matter Of Discipline

Musical was prohibited during certain hours in the precincts of the college, but one undergraduate found the saxophone more engaging than his studies. Next day he received a note from the higher authority: "Such music may be played only for the purpose of discipline only. I am compelled to regard your saxophone playing as music."

## Supplies For Byrd

For the south pole expedition of Commander Richard Byrd, provisions are being laid in at Nunavut, New Zealand. Among the purchases made are several thousand dozen eggs.

"Why are you beginning with two hats?"

"Trade is no trick that I have had to enlarge my premises."—Hus Humer, Madrid.

W. N. U. 1752

# Scientists Eagerly Awaiting The Near Approach of Mars In Hope of Solving its Secrets

Mars is again approaching the earth, and man, who is ever on the Martian track, is getting excited over the prospect of at last winning from the ruddy planet one of its most profound secrets—the existence of intelligent beings.

Two years ago when Mars was in a very favorable position, changes were noticed compared with the observations of 1924. The large area of vegetation known as the "Lake of the Sun" had completely altered its shape and shifted several hundred miles northwards. The "canals" had also changed their configuration.

Was it due to Martian agriculture on a colossal scale or was it the result of a catastrophe of nature? asks the Daily News. The extraordinary fact remains, however, that the "canals" as seen in the photographs have been altered in drawings made half a century ago.

In December, when the planet will be at its nearest again, scientists hope to solve many riddles and to gain some clue whether rational intelligence lies behind the movements of the "Lake of the Sun" and the "canals."

Dr. R. L. Waterfield, the New York astronomical correspondent, writes that the approach of 1926 was probably the most remarkable since those of the late 'seventies and early 'eighties, when Schiaparelli made his discoveries of the Martian "canals." For two years ago things happened on Mars that had never happened before. Certain prominent features of the planet's surface had undergone an entire transformation, since the previous year. Of these the most remarkable was the case of that large, dark oval marking, the so-called "Lake of the Sun."

This is a large area of vegetation covering several hundred thousand square miles; not only had it completely altered its shape since 1924, but it had been shifted bodily northwards several hundred miles, a distance greater than its own diameter. Moreover the system of "canals" leading in and out of it had taken on quite a new configuration.

"Such a phenomenon is entirely unexplained," says Dr. Waterfield. "Was it an earthquake or some stupendous hurricane or tempest that wrought the change? For one has to remember that there are no large oceans on the planet in which or out of which countries can sink or rise. One tentative suggestion was that this was yet another manifestation of the existence of intelligent beings; that we might have been witnessing the fallowing of land upon a vast scale."

"But there were other remarkable changes on the planet; thus in the region of the 'Greater Syrtis' the dark markings had reverted to the form which they exhibited in the drawing of Schiaparelli half a century ago."

"And this is why this coming of the planet is going to be so exciting. Will the Lake of the Sun have moved back to its position previous to 1926, will it have remained the same, or will the change have progressed further in the same direction?"

"Moreover, are we going to find changes of the same nature in other parts of the surface? Finally, will the study of these so far inexplicable manifestations shed any new light on the riddle of the canals, or is fact of the whole of this mysterious little world?"

Maid: "The furniture man is here."  
Mistress: "I'll see him in a minute. Tell him to take chairs."  
Maid: "I did, but he said he would start with the piano and radio!"

The Holyhead lifeboat station, the only one on the British coast with a steam lifeboat, has just completed a century of service.

The tidy suicide—Die Mauseke, Vienna.

## Supplies World's Markets

### Rose Gardens in Bulgaria Furnish Precious Attar

Bulgaria's far famed Valley of Roses has once more captured the world's markets for precious attar. As far as the eye can see a red carpet covers this enchanting region and the peasants smile because they see the end of a long period of depression. Eighty-five per cent. of the world's supply of rose essence, the base of all perfumes, is produced in this district, which stretches for sixty miles through one of the most picturesque regions in Europe.

The delicate rose vines suffered severe damage in recent earthquakes, but this has been overcome, and the crop this year will be only 30 per cent. under normal. There are 43,000 rose gardens in Bulgaria. A hundred thousand Bulgarians, about 14,000 families have no other means of livelihood.

The roses are shipped to 266 distilleries. More than 4,000 pounds of buds are required to yield one pound of attar, which sells in the United States for \$250.

The peasants are still depressed by one factor. They believe that the American girl is sitting less and less than ever before. The latest figures for the export of attar of roses to the United States have reached 10,000 ounces in a year, compared with an average annual demand of 100,000 ounces before the war.

## Winnipeg Newspaper Union

270

A sheer yellow-helge crepe, developed along Princess lines, affects a diagonal clinging bodice, draped so as give slender hips, terminating in huge soft bow with long ends trailing below hemline. The flounces of triple tiered skirt are placed so as give impression of lightness. Style No. 270 is becoming to the slender figure. It is extremely fashionable in black lustrous crepe, black crepe, black, green, champagne-faille crepe, wine red or navy blue. It is perfect for the exclusive dress, designed in sizes 18, 20, 22, 24, 26, 28, 30 and 32. (See also in crepe, if desired.) Wrap coat carefully.

## Must Work On Farms

### British Harvesters Unable To Find Winter Work Must Return Home

A letter written by W. J. Egan, deputy minister of labor, in response to a query sent him by Tom Moore, president of the Dominion Trades and Labor Congress, and which contained a statement respecting the movement and disposition of British harvesters, was read at the congress sessions in Toronto. Mr. Moore, who read the letter, explained that he had seen published reports that jobs were to be found for the British harvesters in the cities following the expiration of the harvesting season.

"I want you to thoroughly digest this statement," Mr. Moore said after he had read the letter, "in effect they are that immigrants for the harvest must work on the farms during the winter or return to their home countries."

Mr. Egan's letter read: "In reply to your inquiry I beg to state that the original inquiry with regard to the harvesters' movement from the British Isles, came from the British government and finally after consultation with the governments of Manitoba, Saskatchewan and Alberta it was decided to proceed with the movement, the responsibility for the same to rest with the British government, and the two Canadian railways, with the railways being responsible for the securing of work during the harvest and winter farm employment, the provincial governments, and this department to co-operate in finding the last mentioned and adequate provision being made for the return of men who cannot find employment."

## Field Hockey Ancient Game

Tablet Recently Found In Athens Represents Youths At Play

Everyday discoveries are being made with regard to ancient people. When some workmen were clearing out the rubbish from one of the walls of the Acropolis in Athens, for which the workmen were using anything that came handy, they came across two marble tablets representing in relief two youths holding hockey sticks in their hands ready to hit the ball, which lies between them, whilst a third is in the act of giving the signal to begin.

A scientist predicts that in a few years people working indoors will work under lamps whose rays will be as beneficial as the sun's.

## CANADIAN HUSKIES FOR BYRD EXPEDITION

When Commander Richard Evelyn Byrd desired dogs for the use of the South Polar Expedition he, naturally, thought of Canada and it was to the north shore of the St. Lawrence in Quebec and Labrador he sent his agents to select and purchase huskies. David E. Buckingham, V.M.O., consulting veterinarian to the Byrd Antarctic Expedition, was along the north shore and inspected the purchases which were assembled at Hamilton, Station Bay and the Finlay Station.

The latter place, just inside the Quebec boundary, had a previous dash of fame as the community which part of the news of the landing of the trans-Atlantic plane, Bremen on Greely Island, was flashed to the world at large.

## TINIEST TOT THERE

Loie Dalgleish, at the age of four, entertained the Highland Gathering at Banff with her terpsichorean agility. She's free Edmonton.

## Caring For House Plants

### Coffee Grounds and Olive Oil Are Two Simple Remedies

Some people have great difficulty in growing house plants, while others seem to be able to grow almost any kind of plant in any house they occupy.

Gas, insect sprays, too little water, too much water, too little sun and too much sun—any or several of these may be responsible.

However, there are several simple plant remedies that may revive sickly house plants. Coffee grounds on the roots three or four times a week will often work wonders, particularly if one teaspoonful of olive oil be added each ten days or so.

## Issues Stamp Journal

Minister's newest and most unique organ, The Stamp Journal, has made its first appearance. The editor of the Journal is William Howard Taft. 12-year-old student and distant cousin of Chief Justice W. H. Taft. With miniature pages 4 by 6 inches, the first issue was a six-page publication, containing stamp news, editorial and advertisements.

# The Mechanical Man Now Applied as a Safety Device For Protection of Railway Trains

## The September Dip

### Sheep Should Be Dipped Both In the Spring and Fall

The spring dipping of sheep is not sufficient for the whole year. To keep the flock free from external parasites sheep should be dipped in the spring and again in the fall. A warm sunny day in September is a good time. A properly arranged dipping tank is a necessity on any farm where sheep are raised. When the sheep arrive home from the fairs and exhibitions, or when fresh stock is introduced dipping should be practiced.

Ticks, lice, and scale appear rapidly and the best protection is dipping. A fully equipped tank for this operation is fully described in Bulletin No. 73, Series, which may be had on application to the Publications Branch, Department of Agriculture, Ottawa. This bulletin of 111 pages deals very fully with "The Sheep Industry in Canada." It contains an historical review of the industry, and chapters on the leading breeds, the establishing of a commercial flock, fattening, marketing, diseases, and other angles of this important industry.

## Carolinian and Italian Bees

### Report Of Tests Contains Information Of Value To Bee Keepers

Comparative tests have been conducted by the Bee Division of the Experimental Farm, Ottawa, to determine the relative value of Carolinian and Italian bees. The Italian bees have the following average crops: 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, ## WORLD HAPPENINGS BRIEFLY TOLD

Thomas Loudon, one-time Canadian sailing champion, died recently in Toronto, at the age of 87.

The first windmill plane has crossed the English Channel, piloted by its inventor, J. De La Cueva.

A Chinese laundry man and the employees of a military shop at Mexico City, divided the first prize of \$400,000, in the September 14th lottery. They held number 1246 which was winner.

Permanent government flying posts in Hudson Strait are a strong possibility it was stated by Squadron Leader T. A. Lawrence, who with eight others, has been returning from 18 months' service in the North.

Members of the provincial government and Lord Lovat, under secretary of state for the Dominion of Wales, the British Government, discussed "the placing of British settlers on the land in British Columbia. The government offered the fullest co-operation."

French Canadians, resident of New England, may decide the presidential election. Ordinarily those of French descent but it is thought French-Canadians will get the majority of the French-Canadian vote which is considerable.

Fire losses in Canada during the week ended September 12, 1928, are estimated by The Montreal Times at \$728,200, as compared with \$239,000 for the previous week, and with \$292,650 for the corresponding week of last year.

Establishment of the largest paper mill in British Columbia is virtually assured, according to a recent report in the Vancouver Star. The lands department, in an interview, stated that the Fraser Paper and Paper Company is preparing to go ahead with the erection of a plant in Prince George.

The committee appointed by the government of Persia to examine the Kellogg pact for the renunciation of war has recommended that Persia adhere to the pact, but should not adhere to the conditions and reservations of certain European governments.

## Mushy File On Homesteads

Rush Is Seen At Dominion Land Office At Edmonton

All previous records since pre-war days were exceeded during the week of August 9th to 15th, in the number of homesteads filed on the Dominion Land Office at Edmonton. The total for the above period this year was 114, while for the same period of last year only 75 such entries were taken up. Local officials attribute the increase to several causes: the general improvement in conditions, the new regulations which permit a party who has previously proved up a homestead to refile on Crown land, and to the large number of settlers now realizing the opportunity to obtain land closer to transportation and social activities than formerly.

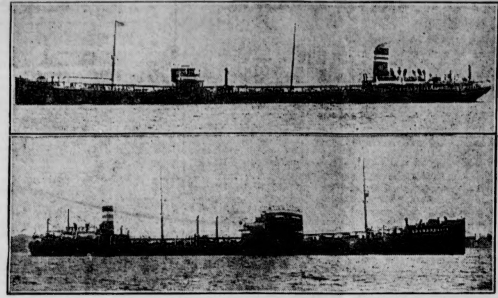

About two-thirds of all the employees in the telephone business in the United States and Canada are women and girls.

It is said man can now fly five times as fast as a bird. Maybe so, but hardly ever hear of a bird coming down out of control.

One medical authority says that the growth of children takes place entirely when they are asleep.

Eagle Brand Condensed Milk has been used by bottle-fed babies for three generations. Write The Borden Company, 1000 Lakeside, Montreal, for Free Feeding Charts and Welfare Booklets.

## LARGEST AND FINEST OIL TANKERS SAIL UNDER CANADIAN ENSIGN

ABOVE—The "C. O. Stillman" would be largest tanker. BELOW—"The Calgarville" most modern of tank ships.

With the launching in England on September 14th of the motor tank ship "Calgarville" Canadian interests which already own and operate the world's largest tank ship, chain also the most modern and efficient of tankers, and a Canadian tanker fleet will further enhance one of the major oil fleets of the world.

The "Calgarville" slipped from the ways at Haverton Hill-on-Tees with its Elder Ross, daughter of Victor Ross, Vice-President of Imperial Oil Limited, acting as sponsor. The "Calgarville" is a 15,000-ton vessel with an indicated horsepower of 8,500, which makes her one of the most powerful and fastest tankers of her size. She is guaranteed to arrive speed of 12 knots. She is 540 feet long with a 70-foot beam and moulded depth of 37 feet 9 inches. Her modern equipment will permit loading and unloading of 120,000 barrels of oil in twenty-four hours, and so she will be almost continuously in transit, serving much as an "oil ferry" between Talara, in Peru, Cartagena in Colombia, and Montreal and Halifax. She will establish new figures for economical transport of petroleum.

The "Calgarville" is the last of three large modern sea-going tankers and one lake tanker which will sail down soon time ago in British waters for Imperial Oil. Preceding her in launching were the "Windfall" for lake service and the "Victrolite" and "Vancolite." The flagship of the fleet in which she will serve is the world's largest tanker, the "C. O. Stillman."

O. Stillman." The three sea-going ships just built in the British yards replace three Imperial vessels which went to the bottom at the hands of the enemy while transporting petroleum for the allied cause. They were the "Luz Blanca," the "Retlaw" and the "Palatine."

The motor driven tanker of today is a highly specialized vessel which is designed to move a great volume of petroleum at maximum speed and with minimum delay at loading and unloading ports. A few years ago three days was considered a quick "turnaround" for a tanker. Today, with modern pumping equipment, a tank ship turns around in twenty-four hours. That is to say, twenty-four hours after she arrives in port she has taken on or discharged her cargo and is again at sea. Consequently the modern tanker is moving practically all the time and, more than any other type ship, is the backbone of her crew. Nothing is over looked to provide complete comfort and the sailors enjoy quarters and cuisine that compare favorably with passenger accommodation on many liners.

The Imperial Oil fleet now comprises also large sea-going motor tank ships: the "C. O. Stillman" of 22,175 tons, the "Victrolite," "Vancolite," "Calgarville," "Montrolite" and "Canadallite" of 15,000 tons, the "Ontariolite" and the "Reginolite"

of 12,000 tons, and the "Trontolite" formerly a steam turbine vessel, which was converted into a motor ship, with a tonnage of 9,150. The combined motor tank ships carry 1,016,000 barrels of oil which they load and discharge at an average port of twenty-four hours. It is estimated that these ships carry for about 25 per cent. cheaper than steamships of corresponding size.

The Canadian tanker companies, Imperial Oil is operating six canal size steam driven ships on the Great Lakes. These move refined products from Halifax to various ports in the Great Lakes and to Fort William serving the Halifax, Montreal and St. Lawrence rivers. Most of these vessels lie up during the winter but in the summer it is a rare thing for one of them to have more than eight or ten hours in port. On the Pacific Coast the SS "Imperial" and two other steam vessels transport petroleum products. The company's company and there is also the small motor ship, the "Marvillite," with a capacity of about 1,000 barrels. The combined capacity of the entire Imperial fleet is approximately 1,100,000 barrels; sufficient to fully load more than 5,300 tank cars, making a train 36 miles long.

The modern ocean-going tank ship contrasts interestingly with the shallow draft river boats which are used by the Imperial interests on the Magdalena River, in Colombia, and which resemble in appearance the old stern wheelers Mark Twain once piloted on the Mississippi.

## A Growing Industry

Fish Reduction Plants In B.C. Doing Big Business

The growth of fish reduction plants on the west coast of Vancouver Island is shown in a report of the Dominion Inspector of Fisheries. With the lifting of the ban in 1926 often plants began operations, and a production of 8,481 tons of pilchard meal and 1,880,724 gallons of pilchard oil were realized. Last season 19 plants were in operation producing 12,315 tons of meal and an oil production of 2,603,190 gallons. The movement in the first year was chiefly to Japan, but in 1927 more than 9,400 tons were shipped to Hamburg. The entire production of pilchard oil last year was shipped to the United States.

## New Insomnia Cure

Lie With Head To North British Doctor Advises

The next time you can't sleep, try lying with your head to the north. The North, instead of counting sleep, the London Evening Standard advises.

"Sleep with the head north and the feet south," the article said, quoting a physician. "The human body is a magnet through which electrons circulate north or south."

It was explained that, as the electrons originate from the thyroid glands of the neck, when the sleeper lies toward the north the electrons travel south away from the brain.

Announcer—"I simply cannot say this evening."

Station Manager—"And why not?"

Announcer—"Because my wife will be listening in — and we're not on speaking terms."

In the Wieliczka salt mines at Cracow there are altars, shrines and statues made of salt.

Louis XIII. often prepared his own food in order to thwart the attempts of enemies to poison him.

## Unique Samples Of Success

New Canadian Awarded Prize For Best All Round Farm

Success in farming in Canada is not bound by any nice limitations of nationality. This was strikingly demonstrated at the standing grain and good farms competitions conducted recently by the Calgary Board of Trade in co-operation with the Provincial Department of Agriculture.

The prize for the best all-round farm in the district was awarded to Toefi Casavoy, of Cochrane, Alberta, who emigrated from Hungary a few years ago. This competitor also won the highest honours for a standing field of oats. The second prize winner was Oscar Anderson, from Sweden. The third winners, Messrs. Wright and Bond, of Irricana, Alberta, were from the United States; while the fourth, R. News, of Edmonton, Alberta, was from England.

Of Toefi Casavoy's farm the judges said that it gave an impression of artistic taste combined with utility. The buildings were well built, well kept and arranged according to an intelligent plan, with everything in good order. Further, this Hungarian farmer's livestock was mostly pure-bred, and his fields were absolutely clean and free from weeds.

## SUNDAY SCHOOL LESSON

SEPTEMBER 30

PAUL, THE MISSIONARY

Golden Text: "Christ liveth in me." Galatians 2:20.

Devotional Reading: Philippians 4:4, 19, 20.

A Review By Means Of Allusions

There have been men like those Jews in every age and every land who have delighted in strutting up and down in their heroic and tender from them.

"Nurse Calver in Belgium was hemmed in by a brutal soldier, who gnashed on her with their teeth, and she was at once heroic and tender and forgiving."

When men refuse to retain God in their knowledge, they can hardly expect to be secure from the temptations of life, and the pleasures of life passions with themselves, whether they are sensualists or heartless tyrants.—The Christian.

The Christian is the native air of Christianity, its cradle-song is that of angels, its death-chant the triumphant acclamation, Behold, I see the heavens opened."

We are all clinging ourselves unworthy of divine grace in every net of selfishness, and we must accept and rely on it.—Lymann Abbott.

"There stood a man of Belgium saying, 'Come over and help me,' and immediately men of Britain arose to the rescue."

We cannot think of the vastness of the universe without feeling that we are citizens of no mean city, but perhaps we should be more impressed by the greatness of God who made the heavens.—J. Arthur Thomas.

"When came the Sabbath of worship and rest. Out of the city, in reverent quest, Down the riverside faithful ones came."

Where prayer was wont to be made in the city, in reverent quest, Down the riverside faithful ones came."

The world has often had its dreams of gods who had come down in the likeness of men, and even of a divine influence pervading all things; but no more combined capacity of the human mind has told how men may come to God.—H. E. Fox.

The talk of Lenin was overbearing and belligerent as he broached out threatnings and slaughter on the road to Genoa.

"What is all this solar energy compared to that boundless energy of the sun—grace—always available to the human mind, and which can turn the world upside down. If only these men could receive and transmit what it is so willing to bestow!"—The Christian.

## Manufacture Asphaltic Oil

Imperial Oil Company Erect Plant In Regina For Production Of Oil For Road Making

A new industry got under way in Regina a few days ago when there was erected a \$25,000 plant by the Imperial Oil Company. It is for the manufacture of asphaltic oil, being used for waterproofering concrete roads in Saskatchewan and also of asphalt for paving and other purposes. The new plant has told how men may come to God.—H. E. Fox.

Shorter Names Suggested

The Society for the Saving of Time, a newly-founded efficiency organization in France, has decided in favor of the shortening of names. It wants to limit family names to five letters and other names to two. In this way, it is declared, the business world would save millions of pounds in correspondence yearly.

The rich get everything. You will notice there was little effort to improve the fall until the upper class was out of season occasionally.

## BABY GIRL HAD DIARRHEA WHEN CUTOFF TEETH

Mrs. A. J. Murray, Galt Lake, Sask., writes: "Last summer, my baby girl had a most distressing bout with diarrhea, with the effects of diarrhea. I didn't know what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Have I any?'"

Dr. FLOWERS' EXTRACT OF WILD STRAWBERRY

why, I wouldn't be without it where there are children.

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was much around as usual."

Put up only by The T. M. M. Co., Limited, Toronto, Ont.

## Protect your machinery

Sun, rain, frost and snow play havoc with machinery, and all implements should be properly housed. Implements that do not need to be elaborated can be erected at low cost. You will save money by saving your machines. It is true economy. Talk it over with our local manager.

TIP TOP TAILORS

## NOXIOUS WEEDS NOTICE

Noxious weeds from mature plants are spread by the wind. Hand pull and burn such plants. Burn any ripe stems of Sow Thistle and Canada Thistle that you may find.

Require all threshing machines, combines, wagons and racks used at the time of threshing, to be thoroughly cleaned before moving on to your farm or leaving it.

Gather and burn all weed seeds left on the ground after threshing. See that your summerfallow goes into the winter "black".

Attend to this or much of the good work that has been done in weed control and eradication will be undone.

Your co-operation in the campaign for a "Weed Free Province" is solicited.

Register all threshing machines and combines with the Department of Agriculture.

W. J. STEPHEN,  
Field Crops Commissioner.

## About Town and Country

An interesting event took place at the home of Mr. and Mrs. J. Shields on Sunday morning, September 23, at 10 o'clock, when their infant daughter Evelyn Martha, was christened by Rev. H. G. Woods. Friends were present from Cadogan, Alta., and Vancouver, B.C.

Following the ceremony a christening dinner was served when covers were laid for ten.

Mr. Oswald Peck left last Sunday for Edmonton, where he will attend University to specialize in agriculture and chemistry.

Mr. and Mrs. J. R. Acheson and son Ross and Mr. and Mrs. Robert Nisbet were Kinderley and Alaska visitors last Sunday.

Mr. Fred Whitlock of Dismore, Sask., was a town visitor last Monday.

Mrs. A. C. Robinson returned to Oyen last Saturday, after spending some days in Kinderley at the home of Dr. and Mrs. W. D. McPhail, and resumed her duties on the teaching staff at Oyen school, Monday.

S. A. Miller will have a radio installed in the store to receive the world's baseball series, the first game of which commences Thursday, October 1.

Miss Catherine Wright who has been temporarily on the staff at Oyen school, left for the country last Sunday evening, and commenced her duties as teacher at Springburn school, the following morning.

Babe Ruth, famed home run king, will be the attraction at Oyen Theatre, Friday and Saturday, this week in "Babe Comes Home". See the king of swat in action.

Pianos—I am agent for the following lines: Steinway, Martin Orme (now Matthews), Nordheimer, Sherlock-Manning and used Heintzman. See me before buying. Geo. J. Benbow.

## LEGAL NOTICES

### Lands For Sale

The Municipal District of Betsworth No. 271, holds title to the following parcels of land, which are offered for sale, subject to whatever Seed Grain Liens are registered and other properties. For particulars of price, etc., apply to W. Linklater, Secretary-treasurer, St. Albert, Alberta.

| Section | Twp. | Rgs. | Mer. |

| N.E. 33 | 29   | 3    | 4    |

In cases in which the Seed Grain indebtedness and taxes amount to more than the value of the land, the amounts may be compromised by order of the Debt Adjustment Board, and by one vote of the Council. If you are interested in any of the above parcels communicate with the secretary of the Municipal District.

W. LINKLATER,  
St. Albert, Alberta.

Mr. Thos. Lees and Mr. James Lees were business visitors in Calgary during the latter part of last week.

"Tim" Mortimer was brought in to the local hospital Saturday suffering from injuries received while moving his threshing outfit. He is reported to be making satisfactory progress.

Entirely new and important schemes involving large expenditures on the part of the Canadian Pacific Railway in the placement of British Columbia upon the land are to be undertaken, through the Department of Colonization and Development of that country, working in co-operation with the Overseas Settlement Committee of the British Government. The details of these schemes have been negotiated during the present visit to Canada of Lord Lovat, Under Secretary of State for Dominion Affairs and chairman of the Overseas Settlement Committee. The undertaking provides for the building of one hundred cottages by the Canadian Pacific for the use of British families. They will be used to make families accustomed to Canadian conditions and farm life before being established on farms of their own.
